

INDIGIMOB FACEBOOK POST

inDigiMOB 

[Smaller Projects]

- 1** Look at some examples for inspiration
- 2** Download the App
- 3** Decide on a positive message to make
- 4** Create the post using existing images or take some new ones
- 5** Export and upload to the inDigiMOB Facebook page

Make a post for the inDigiMOB Facebook page using the App Adobe Spark Post.
Think of a positive message about using social media for the post to be about

what you need

- Computer
- iPad/device
- iPad microphone
- AppBooks log-in
- computer
- leads (Apple/Android)

you will learn

- recording audio
- taking good photos
- exporting/importing files
- file management
- using AppBooks
- screen literacy

tips & ideas

- Check out some examples before you start
- Plan your app with a story board
- Use Android File Transfer to get photos from an Android phone onto a Mac computer
- Name and organise your files so you can find them later!
- You can do this activity with big or small groups
- Use Snap Seed to improve the photos
- Think about other topics you could make an app about next time!
