MY COMMUNITY STORY

inDigiMOB

[Smaller Projects]

1 Take some great photos of your favourite places in the community

2 Record some audio for each photo, explaining why you really like that place

3 Export the files onto the computer and upload them to AppBooks

4 In AppBooks, make a front cover for your app

5 Drag and drop your photos and matching audio into each page of the app project

6 Make sure you have image and content releases if you need them

7 Save and publish!

Introduce your community by making an app about it with photos and audio using AppBooks

what you need

- internet connection
- Computer
- iPad/device
- iPad microphone
- AppBooks log-in
- computer
- leads (Apple/Android)

Great Idea

you will learn

- recording audio
- taking good photos
- exporting/importing files
- file management
- using AppBooks
- screen literacy

tips & ideas

- Check out some examples before you start

- Plan your app with a story board

- Use Android File Transfer to get photos from an Android phone onto a Mac computer

- Name and organise your files so you can find them later!

- You can do this activity with big or small groups

- Use Snap Seed to improve the photos

- Think about other topics you could make an app about next time!
